- ◆ 2002 - Czech independent company with offices located both in the Czech Republic and Slovakia
- ◆ 2012 - new headquarters building
- ◆ 2018 - another new building dedicated to production of instruments
- ◆ Employs a friendly team of more than 100 well trained professionals

Domestic Market

Distribution of laboratory equipment and diagnostics for Czech and Slovak market www.dynex.cz

DYNEX is one of the largest suppliers of laboratory equipment, diagnostics and related services in the Czech Republic and Slovakia.

Its primary focus is the sale of instruments, diagnostics and other reagents for **molecular-biological, microbiological and chemical laboratories**. Our customers are not only clinical laboratories and scientific workplaces, but also transfusion centers, forensic laboratories, food, plant and veterinary laboratories. In order to provide the best care DYNEX has developed its own CRM system tailored to the needs of its specialized customers and partners. DYNEX is experienced in attending public tenders with high success rate.

DYNEX specializes in the following methods: ELISA, immunoblot and westernblot, immunofluorescence assay (IFA), PCR, hybridization, electrophoresis, microarray, next-generation sequencing, lateral-flow immunoassay (LFIA), immunoprecipitation, cultivation and cell growth curves measurements. DYNEX is ready to embrace new methods that might rise up on the market.

Our sales team has more than 20 trained application specialists with MSc or PhD degrees for all above mentioned methods. We have a large demo laboratory and a show room to provide outstanding pre-sale promotion activities and after-sale application support. We also have a conference room for more than 100 people. We provide professional service for all our devices and perform authorized and general repairs.

DYNEX distributes products made by several foreign companies and all related services in the Czech Republic and Slovakia. We represent and promote companies and brands such as EUROIMMUN (since 1996), ESCO, DYNEX USA, Finnpiquette and many others. We had been the only authorized commercial partner of QIAGEN for almost 7 years until April 2020. Moreover DYNEX offers an internationally accredited service of calibration of piston pipettes and other piston volumetric instruments according to EN-ISO 8655.

Global Activities

Development and production of laboratory devices and their export worldwide www.dynex.eu

Since 2004 DYNEX has been focusing on **the research and development** of new laboratory devices and diagnostics. DYNEX has its own R&D team and has been cooperating with many of the most important and prestigious scientific institutions in the Czech Republic and Slovakia.

The DYNEX manufacturing programme includes diagnostic devices for ELISA, immunoblot and westernblot assays and hybridization. We also manufacture a cell thawing system used with cryogenic vials.

Our advanced and cutting edge products can be found in numerous hospitals and diagnostic centers all across Europe. We have quality assurance system certified according to ISO 13485:2016. All our products are **CE IVD marked** and can be manufactured as **OEM products**. We provide technical support and conduct service and application training programmes for our customers or end users.

PRODUCT LINE

STRIP PROCESSING TECHNOLOGIES

◆ DYNABLOT HEAT

An automated instrument used to process strip assays with a temperature control function.

◆ DYNABLOT AUTOMATIC

A fully automated instrument for the immunoblot and western blot assays with a sample pipettor and camera.

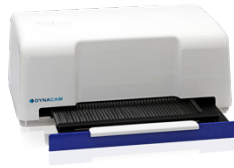

◆ DYNABLOT PLUS ◆ DYNABLOT COMFORT

Automated instruments used to process the immunoblot and western blot assays.

◆ DYNACAM

An instrument used for image scanning of immunoblot and western blot strips with a drying function.

◆ DYNAWASH-B

A strip manual washer that simplifies washing steps in immunoblot and western blot.

MICROPLATE PROCESSING TECHNOLOGIES

◆ DYNAREAD

A fully automated microplate reader for ELISA.

◆ DYNAWASH AUTOMATIC

A fully automated microplate washer for ELISA.

◆ DYNAWASH-E

A microplate manual washer that simplifies washing steps in ELISA.

◆ DYNAMIC

An automated 96channel dispenser for MIC method.

CELL THAWING TECHNOLOGIES

◆ DYNATHAW-V

Automated device for standardized cell thawing.

We have quality assurance system certified according to **ISO 13485:2016** and all our products can be manufactured as **OEM products**.
